- Illustration & Drawing

Projects

Fashion Store

- The purpose of the software project is to develop a program which provides a friendly interface for the user to explore the products of the clothing store and buy them according to their choice.
- This program mainly brings forth the usage of GUI programming in the daily usage over the network
- We have used Java, DBMS and OS for developing this website development project.

Memory Matching Game

- Matching games are games that require players to match similar elements. Participants need to find a match for a word, picture, or card.
- The players could select the grid according to their wish and then start the game.
- We have used HTML, CSS and JavaScript for developing this game.

Certifications/Achivements

- Completed 3 months of paid internship as a GRAPHIC DESIGNER in a startup company LP Investments Dec 2021-Feb 2022.
